☰ OBJECTIVE

Ambitious, unique, and passionate top performing college student working towards a BS in Computer Engineering. Eager to gain further experience in the technology industry, widen horizon and exponentially upskill through an internship position. Developed strong work ethics, interpersonal relations working on various school and developer community projects.

🎓 EDUCATION

Computer Engineering | Nile University of Nigeria
SEPTEMBER 2019 – PRESENT
- 4.82 CGPA
- Top 10% performer in Computer Engineering Department
- 1st Position at the Google Solution Challenge Hackathon in Nile University
- Lead a team of four to the 2021 Google Solutions Challenge competition

Secondary School | Glisten International Academy, Abuja
SEPTEMBER 2016 – JULY 2019
- Overall best student Technology Department for 2 consecutive years
- Second Runner up in the National First Lego League Robotics competition
- Runner-up in the Glisten ICT Design competition

💼 EXPERIENCE

INTERN | Utility Ware
MAR 2021 – SEP 2021
- Contributed to the frontend of their upcoming internship dedicated website with my team.
- I lead a sub-team to simulate an application store and its console like play store.

💼 VOLUNTEERING

AI/ML development Lead | Google Developer Student Clubs Nile University
SEP 2021 – PRESENT

I was appointed as the development lead in the Artificial Intelligence team. This is a great opportunity for me to create awareness of the impact of AI in our lives and how to help students build solutions using the technology.

Campus Ambassador | Cowrywise
DEC 2021 – PRESENT
I am volunteering as a Cowrywise ambassador to enlighten students and non-students alike about boosting their financial health through knowledge about savings and investment opportunities on the Cowrywise platform.

CERTIFICATES

- Microsoft Office Specialist: Microsoft Office PowerPoint 2016
- Microsoft Office Specialist: Microsoft Office PowerPoint 2013
- Kaggle: Intro to Machine Learning
- Udemy: Data Science Using Python
- IBM: Artificial Intelligence Intro

PROJECTS

STARTVEST | www.startvest.io

– Startvest is an equity crowdfunding platform that allows people with creative ideas to register and get access to investors. We provide everyone the option to see disruptive ideas and startups at the early stage, and we also give startups the platform to post job vacancies for job seekers.

INTERNA | www.startvest.io

– Interna is a platform with the sour aim to help students know more about Internship in their various field of study. The targeted users are students in the universities preparing to go for their Industrial Training. The platform is designed to allow students currently on their internship to share their experiences and their advice to those who are currently preparing.

VOLTEX | github.com/Hanif-adedotun/voltex

– Voltex is a platform that solves the problem of having to create a backend to store user responses for your custom frontend forms. Developing a backend requires so much coding knowledge, time, and money, so why waste these precious resources when you can use Voltex for free?

DEVTRANET | www.devtranet.tech
MAR 2021 – SEP 2021

– Devtranet is a global network for developers and technologists to connect, build, and discover opportunities. The platform is built to host worldwide hackathons.
